

City of Muskego Well No. 13

Can You Locate the 2,500 Gallon per Minute Municipal Well?

The City of Muskego's Well No. 13 is both a stylish public works building and a high capacity municipal well. Designed to blend seamlessly into an upscale subdivision, the complex architectural style and landscaping give no hint that up to 2,500 gallons per minute of radium-free water can be pumped to serve the needs of this growing community.
