AMERICAN COUNCIL OF ENGINEERING COMPANIES
of Wisconsin

US Highway 2 Reconstruction City of Ashland, Wisconsin

SEH partnered with the City of Ashland and the Wisconsin Department of Transportation to reconstruct this highly visible, 20-block-long corridor which serves as the City's main commercial thoroughfare and its gateway for visitors to Lake Superior's beautiful Chequamegon Bay.

PROJECT HIGHLIGHTS

- Successful replacement of 100-year-old underground utility infrastructure
- Construction of bio-cell basin to minimize impact of stormwater flowing to Lake Superior
- Extensive streetscaping, including in-pavement lighting, colored pavement at crosswalks, burial of overhead utilities, historical lighting, and pedestrian underpass
- High degree of cooperation between all parties involved, including the public
- Creative funding process
- Excellent safety record
- Completed on time and within budget
